Professional Summary

Computer Science & Designing undergraduate at SVIT, Vasad, interested in game development and interactive applications. Building Unity projects with C#, focusing on 2D gameplay, combat mechanics, game systems, and scene design. Also experienced with Gemini API integration and frontend web development. Seeking opportunities to contribute to game development projects while strengthening software engineering skills.

Education

Bachelor of Engineering, Computer Science & Designing Aug 2024 – Present
SVIT, Vasad CPI: 8.30

Higher Secondary (Science – PCM), Bright Day School, Vadodara 2024
83%

Secondary School, Bright Day School, Vadodara 2022
91%

Technical Skills

Programming: C, C# (learning), Java (Basics), Python(Learning)
Game Development: Unity 6, Unity Editor, 2D Game Development, Player Movement, Raycasting, Combat Mechanics, Scene Management
Web Development: HTML, CSS, JavaScript, Responsive Web Design
AI & APIs: Gemini API Integration, Prompt Engineering, AI-Assisted Development
Tools & Databases: Git, GitHub, Antigravity CLI, VS Code, Netlify, MySQL (Basics)
Professional Skills: Teamwork, Communication, Leadership, Event Coordination

Projects

NEURAL OVERRIDE – 2D Action-Survival Game(Ongoing) Sep 2026 – Present
Unity 6, C# | GitHub Repository

- Developing a top-down 2D game in Unity using C#, with movement and aiming across the X–Y plane.
- Implementing 360-degree aiming, raycast-based laser combat, a persistent coin economy, an upgrade shop, and multi-level environments.
- Using Antigravity CLI with an MCP server to assist script scaffolding and scene generation.

RPG Game Development (Ongoing) Jul 2026 – Present
Unity, C# | GitHub Repository

- Building a beginner-level RPG while following a game development course, practising player movement, combat, animation, and scene management.

AI Blog Generator Jul 2026 – Aug 2026
Gemini API | GitHub Repository

- Developed an AI-assisted blog generation application integrating the Gemini API; worked on application logic, API integration, and debugging.

Roll-a-Ball: Enhanced Edition | GitHub Repository

- Built a 3D Unity game featuring player movement, collectibles, physics interactions, and particle effects.

Web Development Projects | GitHub Repository

- Created a personal portfolio, Pomodoro timer, and calculator using frontend web technologies; practised responsive design and deployment with Netlify.

Experience & Leadership

Junior Training & Placement Coordinator, SVIT Feb 2026 – Present

- Support placement activities, workshops, student communication, and coordination between students and the Training & Placement Cell.

Karate Instructor, The Bhayli Dojo

- Conduct training sessions, mentor students, and assist with class management and coordination.

Certifications

- Programming for Everybody(Getting Started with Python) - University of Michigan
- Black Belt 2nd(NI) DAN in Karate - Karate India Organization(KIO) Certified.

Activites

Technical Activities:

- Participated in Mecia Hacks 2.0, attended Google Cloud Community Day,and joined webinars on AI and ethical hacking, attending Workshops on Game Development at college level.
